7 Signs Your Feasibility Study is Outdated

If you're still doing feasibility studies the old way, you're losing time and money. Here's how to spot the warning signs – and what to do about it.

It Takes Weeks to Complete

Still waiting **2-4 weeks** for a basic feasibility report? In today's fast-moving market, that delay alone can cost you a deal.

The Old Way

Manual data collection, consultant back-and-forth, and slow turnaround.

The Modern Standard

AI-powered analysis in minutes, not weeks.

You're Paying \$10K+ Per Study

\$10K+

Per Consultant Study

Traditional firms charge thousands for reports that take weeks to deliver.

30

Minutes with AI

Modern tools generate comparable institutional-grade analysis in a fraction of the time.

~0

Manual Effort

Automated workflows eliminate the need for expensive consultant hours.

Paying consultants thousands for what AI can do in minutes is no longer a necessity – it's a choice.

You're Still Using Manual Excel Models

The Spreadsheet Trap

Hours spent tweaking spreadsheets for every scenario change. One broken formula can derail an entire analysis. Manual models are fragile, error-prone, and impossible to scale.

→ Every scenario change means rebuilding from scratch

→ Version control becomes a nightmare

- Audit trails are nearly impossible to maintain

SIGN #4

FeasiBuild

Your Assumptions Are Static

Can't quickly test "**what-if**" **scenarios** without starting over? Static assumptions lock you into a single narrative – and when the market shifts, your study becomes obsolete overnight.

Rigid Inputs

Changing one variable breaks the entire model.

No Iteration

Exploring alternatives requires manual rework.

Real-Time Needed

Dynamic studies update as conditions change.

Made with GAMMA

You're Relying on Generic Market Data

Relying on **outdated reports** instead of real-time AI analysis means your decisions are based on yesterday's market – not today's reality.

✗ Legacy Reports

Purchased annually, already stale by Q2.

✓ AI-Powered Data

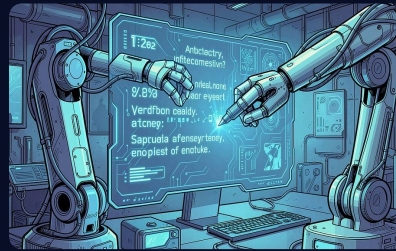

Continuously updated, location-specific, and context-aware.

There's No Automation

Manual Narratives

Writing executive summaries and market analyses by hand – hours of repetitive work that AI can handle instantly.

AI-Generated Insights

Automated narrative generation delivers polished, professional reports with zero manual effort.

Time Reclaimed

Teams using automation redirect hours from report-writing to strategic decision-making.

You're Dependent on Your Consultant

The Dependency Problem

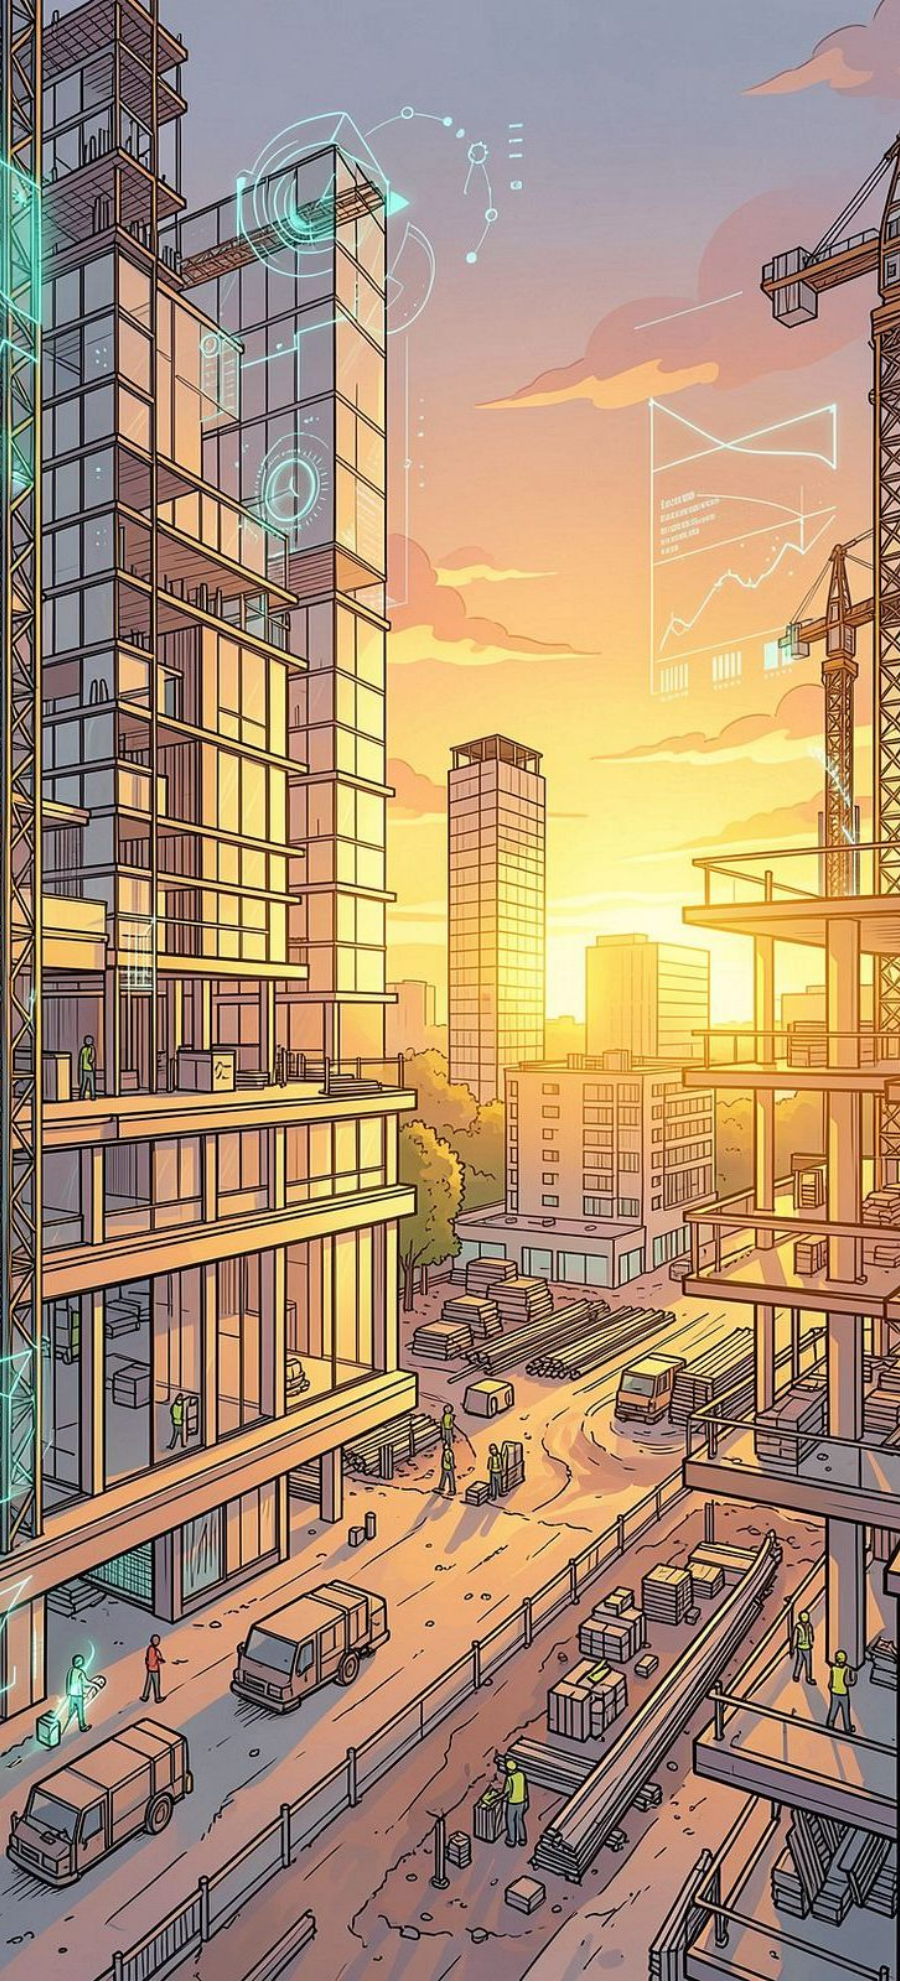

Need to call your consultant **every time** you want to adjust a variable? That dependency creates bottlenecks, delays, and unnecessary costs at every stage of your project.

Every question = another billable hour

Turnaround times slow your pipeline

You can't iterate independently

THE SOLUTION

FeasiBuild

Ready to Modernize Your Feasibility Studies?

FeasiBuild delivers institutional-grade analysis in **30 minutes**, not weeks. Stop losing deals to slow, expensive, outdated processes.

30-Minute Reports

AI-powered feasibility studies at the speed of your decisions.

Fraction of the Cost

Replace \$10K+ consultant studies with affordable, on-demand analysis.

Fully Automated

Dynamic scenarios, real-time data, and AI-generated narratives – all in one platform.
