

FeasiBuild is LIVE!

Institutional-grade feasibility studies in minutes

From assumptions to a bankable feasibility report – without the weeks, the consultants, or the \$10K+ price tag.

Made with GAMMA

The Old Way Was Broken

Weeks of Work

Manual data gathering, consultant coordination, and back-and-forth revisions delay every decision.

\$10K+ Per Study

External feasibility consultants charge premium rates for deliverables that may not even fit your scenario.

Locked Excel Models

Proprietary templates you can't audit, modify, or reuse – you're dependent on the consultant forever.

Restart Every Time

Each new scenario, site, or jurisdiction means starting from scratch with no reusable foundation.

The New Way: Built for Developers

What FeasiBuild Delivers

- **30 minutes** from input to complete feasibility report
- **\$99 lifetime** – one-time access, no recurring fees
- **You own the model** – fully transparent, editable, and auditable
- **Scenario-ready** – test assumptions instantly without rebuilding

Six Components. One Complete Study.

Every FeasiBuild study follows a structured, institutional-grade framework – from raw assumptions to a polished feasibility report ready for lenders and investors.

01

Assumptions

Define project scope, unit mix, and development timeline

02

Market Analysis

Comparable sales, absorption rates, and demand signals

03

Financial Model

Cost breakdowns, revenue projections, and cash flow

04

Financing

Debt structuring, equity requirements, and loan metrics

05

Risk Analysis

Sensitivity testing, scenario modeling, and downside cases

06

Feasibility Report

Executive summary, IRR, equity multiples, and go/no-go signals

Jurisdiction-Native by Design

FeasiBuild isn't a generic template – it's built with jurisdiction-specific regulations, escrow structures, and compliance frameworks baked in from the start.

Dubai

Escrow account requirements, RERA compliance, and off-plan sales structures

Malaysia

HDA-compliant delivery schedules, progressive payment structures, and Bumiputera quotas

Australia

10/90 settlement models, stamp duty calculations, and pre-sale thresholds

Simple, Transparent Pricing

Explorer — Free

Get started at zero cost. Explore the framework, test assumptions, and see the model in action before committing.

Pro — \$99 Lifetime

Full access to the complete feasibility model. One-time payment. Own it forever. No subscriptions.

Packs — Team Access

Multiple licenses for teams and firms. Share models, collaborate on scenarios, and scale your workflow.

Unlimited — Enterprise

Unrestricted access for high-volume developers and institutional teams. Built for scale.

FeasiBuild

Your Next Feasibility Study Starts Here

Stop waiting weeks and spending thousands. FeasiBuild gives you the speed, ownership, and rigor that institutional developers demand – at a fraction of the cost.

 **Try Free**

Start with the Explorer tier – no credit card required

 **Get Lifetime Access**

Unlock the full Pro model from just \$99
