

FeasiBuild

What FeasiBuild Actually Does

The AI financial engine for real estate development.

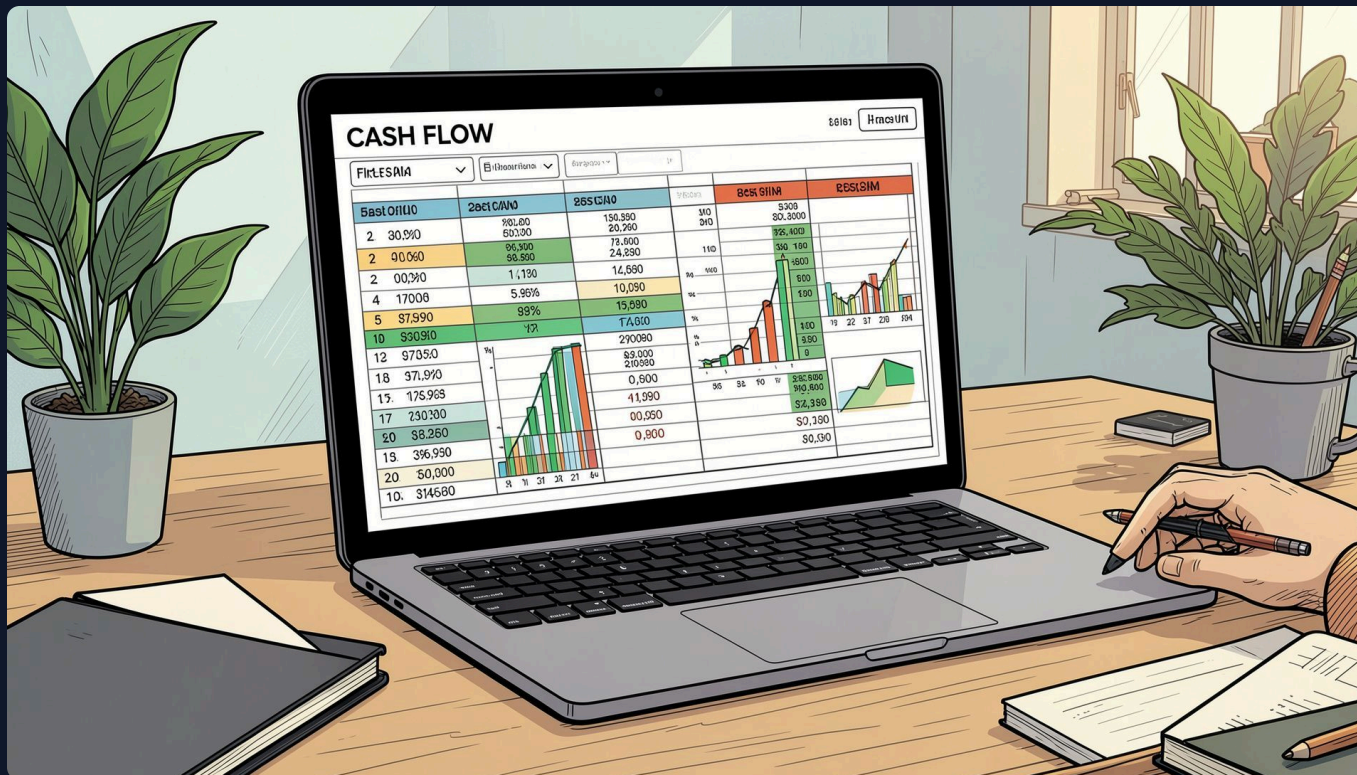

You input your project data once. It handles the rest.

Made with GAMMA

CORE CAPABILITY

Automated Financial Modeling

Dynamic Cashflows & Waterfalls

Full equity waterfalls, IRR, NPV, DSCR, LTC, and peak equity – calculated automatically.

Construction S-Curves

Milestone-based draw schedules tied to jurisdiction-native release triggers.

Jurisdiction-Native Logic

Dubai Escrow Law No. 8, Malaysia HDA, AU 10/90 – baked in, not bolted on.

☐ "The math respects local law – automatically."

MARKET INTELLIGENCE

AI Market Research

Not generic country-level fluff. FeasiBuild generates macro and micro commentary tailored to your exact asset type and location.

Sub-Market Benchmarks

Lease rates, vacancy, absorption, and land comparables – specific to your sub-market.

Institutional Tone

Written for credit committees and investment panels, not marketing brochures.

Asset & Location Aware

Research that knows your zip code – not just your country.

Multi-Factor Scenario Analysis

Stress-test every key driver simultaneously. Costs, prices, rates, delays – all modeled side by side in seconds.

→ Sensitivity View

Isolate which assumptions move the needle most.

→ Residual Land Value

Back-solve maximum land bid under each scenario.

→ Go/No-Go Clarity

See the downside before the market shows it to you.

DELIVERABLE OUTPUT

The Bankable 30+ Slide Deck

Auto-generated, white-labeled, and ready for the credit committee – with your logo on the cover.

AI Helpers That Prevent Row-1 Errors

Intelligent Defaults

Contextual guardrails catch mistakes before they compound – like applying an HDA deposit schedule to a warehouse project.

Fast Iteration Loops

Change one input and everything updates instantly. No broken links, no stale formulas.

Contextual Guardrails

Catches jurisdiction mismatches and logic errors in real time.

Instant Recalculation

Full model updates in seconds, not minutes.

Smart Defaults

Pre-populated benchmarks reduce setup time dramatically.

PRIVACY & CONTROL

Your Data. Your AI. Your Edge.

Zero-knowledge by design. FeasiBuild encrypts your project data in your own private Puter cloud – never ours.

Encrypted Private Cloud

Your data lives in infrastructure you control. No third-party exposure.

Choose Your AI Engine

Qwen, Claude, or OpenAI – you decide which model powers your analysis.

Zero-Knowledge Architecture

We cannot see your inputs, your assumptions, or your outputs. Ever.

WHO IT'S FOR

Built for the Entire Capital Stack

Developers

Underwrite projects faster and present bankable cases to lenders and partners.

Investors & Financiers

Evaluate deals with institutional-grade models and scenario clarity.

Valuers & Consultants

Deliver comprehensive feasibility studies with professional narrative and charts.

PRICING

Start Free. Scale as You Grow.

Explorer — Free

1 watermarked report. Full feature access. No credit card required.

Pro — \$99 Lifetime

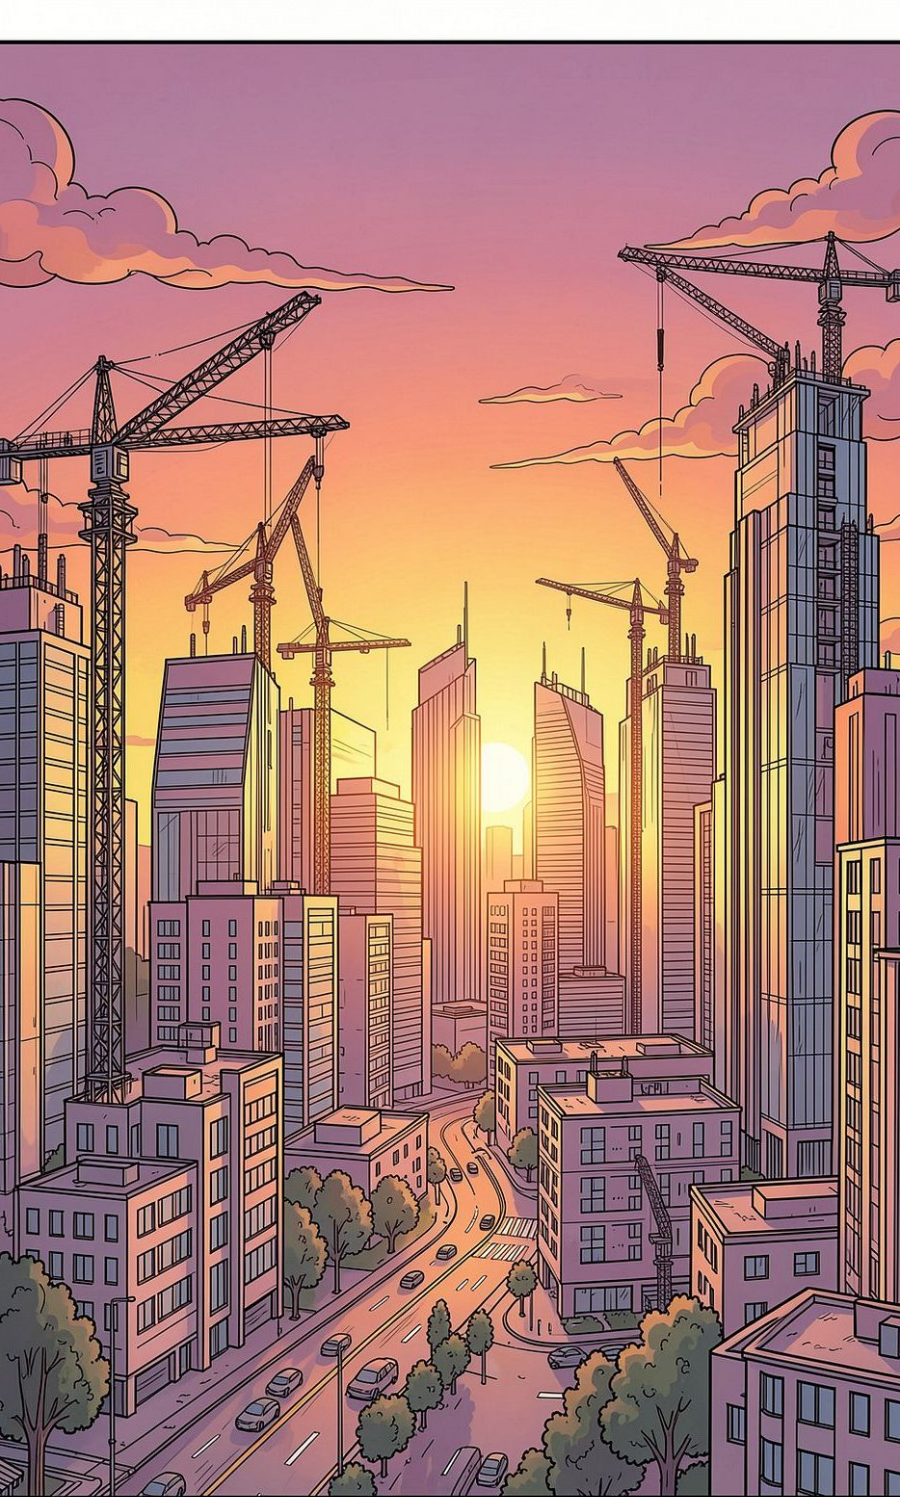

Unlimited reports, white-label PDF, and full AI engine access.

Unlimited — \$2,400/yr

Team access, API integration, priority support, and credit packs.

✓ **Your first report is on us.** Try the Explorer tier at feasibuild.app – no commitment required.
